

Dear SJCC Students,

Great news! In just one semester, you may be able to complete the math requirement for transfer by directly enrolling into a transfer-level math course based on your high school performance.

How Do I Enroll in Transfer-Level Math?

1. No need to take the Accuplacer assessment test or choose a math class based on a test score.
2. Instead, meet with a counselor to choose the best transfer-level math course for your career goal.
3. To help with this meeting, bring a copy of your high school transcripts to the SJCC Counseling Department drop-in services in the Student Center (SC-201).
4. We'll accept your self-reported cumulative GPA if you're having a difficult time attaining transcripts.
5. If you are currently enrolled in MATH 311, MATH 111, or MATH 13, you may now skip straight into a transfer-level math course.

How Do I Plan for Success In One Semester?

We have developed MATH X courses. For example, MATH 63 can be taken with MATH 63X Just-in-Time-Support for Elementary Statistics. Enrolling in both these courses will provide you the following:

- Same instructor for both
- Peer tutor
- Free textbook loan
- Free calculator loan
- Academic counseling

For students who wish to take the ESL (English as a Second Language) assessment test, you may call the assessment office to schedule an appointment (408) 288-3170 or schedule [online](#). An ESL orientation will be scheduled for you where you can meet with a counselor and an ESL Advisor to go over your results.
