Geography Program SLOs

Upon completion of degree and certificate course work in the Geography Program at San Jose City College, students will be able to:

- Analyze, synthesize, and apply core geographic principles, concepts, models, and phenomena

- Classify regions and describe how regions are constructed and applied in geographic analysis.

- Identify examples of human-environmental interaction and assess their past, present, and future impact.

- Assess patterns and processes of spatial interaction, movement, and diffusion, to explain their significance, and to understand analytical methods.

- Evaluate and apply geographic methods and associated theories used to analyze and advance geographic concept.
